

HOW MUCH DOES A NEW GAS METER COST?

Thinking about getting a new gas meter fitted? Unsure on the costs or even what size meter you need? Don't worry, we've got you covered.

FIRSTLY, WE NEED TO ANSWER A QUESTION, WHAT SIZE GAS METER DOES MY BUSINESS NEED?

- You need to measure the pressure that is in the gas mains, this can be low or medium.
- The peak demand of gas that's needed at any given time. This can also be known as the maximum capacity or gas load. It is measured in kilowatts, cubic metres/feet per hour, and can sometimes Therms or BTUs (British Thermal Units).

NEXT, HOW DO I CALCULATE WHAT SIZE GAS METER MY BUSINESS NEEDS?

- Distance from gas meter to appliances - This may give you a clear idea of whether or not you need a larger meter, as the gas pressure will drop as the distance increases.
- Type and quantity of appliances - When calculating the total demand for your property, we need to measure all gas equipment to make sure we get an accurate reading.
